

Construction of Municipal solid waste sorting complex in Kurakhove city

Project description	
Project initiator	Kurakhove City Council
The essence of the project	Municipal solid waste sorting with subsequent formation of secondary raw materials. The venture's capacity is up to 15.0 thousand tons per year.
Project goal	Improving the waste management system in the region.
Compliance with strategic documents and assignation of priorities	Complies with the National Waste Management Strategy in Ukraine until 2030, approved by Order No. 820-R of the Cabinet of Ministers of Ukraine dated November 08, 2017 (with amendment). The strategy provides for increasing the level of recycling of household waste. In the period up to 2023, up to 23 percent of municipal waste should be recycled in the country and waste sorting and disposal plants should be entered into service. According to the Waste Management Program in the Donetsk region for 2016-2020, Kurakhove city defined as a regional recycling center of the Eastern group of cities in the Donetsk region.
Study of the problem that will be solved as part of the project implementation	<p>The region annually generates about 0.5 million tons of municipal waste, the total amount of landfilled wastes in landfills is 18.5 million tons. Landfilling of wastes in landfills that do not meet the standards leads to environmental pollution and loss of the resource potential of waste.</p> <p>The lack of a recycling system (including a separate collection system) of municipal waste leads to the loss of millions of tons of resource-valuable materials contained in waste, which can potentially be put into economic circulation. The development of separate waste collection and recycling is an integral part of improving the efficiency of Natural Resources use and the transition to a sustainable economy.</p> <p>The project requires an environmental impact assessment procedure.</p>
The estimated cost of the project amounts to	39 642,328
Project Implementation Arrangement	Creation of a joint venture on mutually agreed terms, attraction of financial support in form of a grant, state and local budget funds
Key financial indicators of the project implementation	Undefined
Project implementation term	14 months
Indicative funding sources to finance the project	Investor funds, grant funds, budget funds.
Project Implementation Arrangement	The project "construction of a municipal solid waste complex" has been drafted. Kurakhove", expert report of the state enterprise "NDIPROEKTREKONSTRUKTSIIA" dated 14.06.2018 No. 10-00507-17.
Interested parties and expected	Target groups:

result of the project implementation	<ul style="list-style-type: none"> - Executive authorities and local self-government bodies. All parties interested in attracting investment, creating new jobs, and solving the problem of municipal waste recycling. - Municipal enterprises. The opportunity to become owners/co-owners of capacities, consumers of the product. - Citizens. <p>The ultimate beneficiary is the Kurakhove city territorial community.</p>
Characteristics of an object (existing or newly created)	
Location of the object	Kurakhove, Donetsk region, Ukraine. The plot is defined.
Description of existing objects or those that are proposed to be created as part of the project implementation	Technological capacity for sorting municipal solid waste with a volume of up to 15.0 thousand tons of waste per year.
Form of property	Communal
Related infrastructure	The plot is defined. It will require installation of utility systems, setting up access roads.
Land area, hectare	The plot is defined. The area demand is 0.495 hectare, the built-up area is 0.109 hectare.
Land plot status	Communal property.
Levelling of land	A detailed plan of the territory has been drafted.
