

Processing and production of fish meal

Project description	
Project initiator	Sole proprietor Kuznietsov Dmytro Petrovych, Mariupol City Community.
The essence of the project	Organization of production of fish meal and related products of raw fish of the Sea of Azov with the involvement of the latest European technologies. This project involves: the purchase of a waste-free fish meal production plant, other products and the purchase of refrigeration equipment. Main products: fish meal and fish oil, which are used in the production of mixed feed for agricultural production (livestock, poultry, fluff and pond fish production), using feed mixtures with protein and omega 3
Project goal	Organization of production of fish meal and related products of raw fish of the Sea of Azov with the involvement of the latest European technologies.
Compliance with strategic documents and assignation of priorities	The planned project activities corresponds to task 1.2.4. "Development of a modern system of agricultural products processing in accordance with market needs" operational goal 1.2. "Reasonable specialization based on knowledge and innovations" strategic goal 1 "updated competitive economy" of the Donetsk Region Development Strategy for the period up to 2027.
Study of the problem that will be solved as part of the project implementation	There are no similar production facilities in Ukraine, and the consumer market of the products that will be produced has been analyzed.
Estimated project cost	3,200. 00 thousand dollars. USA.
Project Implementation Arrangement	Debt money, grant funds
Key financial indicators of the project implementation	The implementation period is 4-6 months on the terms of 35% prepayment, 60% when declaring equipment, and 5% when starting equipment at the project site. The payback period of the project is 2.5 – 3 years
Project implementation term	2022 (subject to the availability of investment funds)
Indicative funding sources to finance the project	Grant or debt money subject to an interest rate not exceeding 5% per annum
Project Implementation Arrangement	The business plan and design and estimate documentation has been developed
Interested parties and expected result of the project implementation	Target groups: Residents of the community, local self-government body, project initiator, farmers. Expected results: job creation, filling of the consumer market with the necessary products
Characteristics of an object (existing or newly created)	
Location of the object	Possible production location: Mariupol city Konservna street. blg. 1

Description of existing objects or those that are proposed to be created as part of the project implementation	This project involves the purchase and installation of a waste-free plant for the production of fish meal and refrigeration equipment
Form of property	Private
Related infrastructure	The existing infrastructure needs to be reconstructed. The parent company undertakes to restore and reconstruct the municipal infrastructure within the industrial park. If the production facility is located on the selected plot of land, it will have such infrastructure advantages as: - proximity to central road junctions; - a separate railway line; - marine pier .
Land area, hectare	It is planned to create a new enterprise on an area of 4 hectares. Currently, the necessary land plot, which should become part of the Industrial Park has been selected. The plot is located at the mouth of the Kalmius river with access to the Sea of Azov. There is a ready-made pier on the territory .
Land plot status	Currently, the plot is under lease, negotiations on the transfer of the plot to communal ownership to create an industrial park are in progress with the tenant. Intended use Industrial land Current usage Not used.
Levelling of land
