

## Creation of production for processing grain into groats

Project description	
Project initiator	WestAgro Farm
Project concept	<p>Within the framework of the project, it is planned to create the production for processing grain into groats.</p> <p>The aim of the project is to create additional value of own agricultural products, create new jobs, rational and efficient use of agricultural land, and ultimately increase the profitability of production and, accordingly, increase taxes to the budget.</p> <p>- the total estimated cost of the project is UAH 900 ths.;</p>
Project goal	Providing the population with high-quality natural oil, flour and ready-made bakery products at affordable prices.
Compliance with strategic documents and justification of priorities	<p>Planned project activity corresponds to</p> <ul style="list-style-type: none"> <li>- Development strategies of Donetsk region for the period up to 2027</li> </ul>
Research of the problem that will be solved within the project implementation	<p>The absence of flour and oil workshops, mini-bakeries on the territory of Chasiv Yar City Territorial Community will allow the investor to provide potential consumers with grain and seed processing services.</p> <p>Production will be able to meet the existing demand for products. The creation of production on the territory of city territorial community will reduce transportation costs, increase the number of jobs.</p>
